Question 2:

The difference between margin and padding is that padding is external to the element being referred to, while margin is internal. Also padding can be specified for each side, while margin only has one general option.

Question 3:

The right way to specify padding is as follows:

```
padding: 10px 20px 30px 40px
```

With the top padding being 10px, right 20px, bottom 30px and left 40px;

Question 4:

The correct way would be:

```
.btn.green {
// style goes here
}
```
